

GSA SIN 874-4	
Logtool Executive Overview	1 hour brief designed as an executive overview of the logistics data proficiency program: This program targets the process improvement, reengineering methodologies and principles to conduct process modernization projects using proficiency with DOD logistics databases & database tool sets. Travel Cost Additional IAW FAR and JTR.
Logtool General Overview	1 hour brief designed as an overview of Logistics Exchange and Logistics ToolBox. Introduction to different automated logistics tools and their uses to assist in technical screening, stock checks, requisitioning and checking status. This program targets the process improvement, reengineering methodologies and principles to conduct process modernization projects using proficiency with DOD logistics databases & database tool sets, such as DLA's LINK, WebCATS and WebVLIPS programs. Travel Cost Additional IAW FAR and JTR.
Logtool Summary	4 hour class is designed to introduce many automated logistics applications. Student will learn how to run queries, manage data and perform batch processing. This program will instruct students in DOD logistic specific databases; examine existing material assets, disposal items, and techniques involving various databases which will help to improve the current material support process. DoD systems training may include but are not limited to DLA SAMMS, LINK, LOGRUN, DRMS, WebVLIPS and DSS, Army's LIDB and Navy's VMSIR. Travel Cost Additional IAW FAR and JTR.
Logtool Class	This 8 hour program provides additional hands-on training and exercises. It is designed to introduce many automated logistics applications. Student will learn how to run queries, manage data and perform batch processing. This program will instruct students in DOD logistic specific databases; examine existing material assets, disposal items, and techniques involving various databases which will help to improve the current material support process. DoD systems training may include but are not limited to DLA SAMMS, LINK, LOGRUN, DRMS, WebVLIPS and DSS, Army's LIDB and Navy's VMSIR. Travel Cost Additional IAW FAR and JTR.
Logtool Customer Assist Visit	3 day on-site assistance to implement and provide 'over the shoulder' training to target the process improvement, reengineering methodologies and principles to conduct process modernization projects using proficiency with DOD logistics databases & database tool sets. The program will instruct students in DOD logistic specific databases; examine existing material assets, disposal items, and techniques involving various database integration schemas to improve the current material support process. DoD systems training may include but are not limited to DLA SAMMS, LINK, LOGRUN, DRMS, WebVLIPS and DSS, Army's LIDB and Navy's VMSIR. Travel Cost Additional IAW FAR and JTR.
Logtool Marketing Event	This 3 day package is tailored to the customer's unique requirements through an extensive interview and analysis process. The resulting deliverable is targeted to address the specific areas required by the customer. Travel Cost Additional IAW FAR and JTR.
Weekend/Holiday Travel Time	Travel required to be performed during weekends and holidays
